The brand-new generation of 4K screen mirroring device The input text will be clear

Dual-band WiFi

Stable and smooth

Reverse touch

Bidirectional control

Paired with the brand-new self-developed HT-6 wireless screen mirroring device from 丽, it features dual-band and dual-core support, enabling 4K screen mirroring. It supports stable, smooth and clear projection of pictures, videos and documents. It also supports USB/Type-C dual interfaces, allowing for seamless projection from both new and old mobile devices.

Four quarters on the same screen

The comparison of the schemes is clear at a glance.

Supports simultaneous screen projection from mobile phones, tablets, computers and other devices. Split-screen comparison makes the solution clear at a glance, facilitating efficient decision-making in meetings.

Intelligent screen projection, supporting multiple projection methods, including wireless projection, software projection and mobile phone projection.

Dual-band and dual-Wi-Fi modules ensure that screen projection and network connection do not interfere with each other.

Multi-screen interaction

The conference venue was covered in every aspect

Haoli has professionally developed a screen group function for large conferences, which enables one large screen to project to multiple large screens. It supports up to 128 screen groups, making it easy to handle various large-scale meetings.

Outstanding performance
High scores both inside and out

Horion

High performance and large storage capacity join forces

Equipped with 4G of running space and 32G of high-speed memory, whether it's file storage and reading, data transmission and operation, you can enjoy the extraordinary experience brought by advanced computing power.

1.8GHz main frequency

Super performance release, smooth response

Four Calculation capabilities

It adopts the high-performance Cortex-A55 processor

34%

Smooth operation and efficient speed improvement

Powerful dual system (Optional)

One-click switching for independent operation

High-performance windows system optional, professional-level plug-and-play modular design for convenient upgrade, stronger processing capacity, easy loading of massive files, and a smooth and efficient office experience.

High-fidelity audio system

Powerful and three-dimensional, each sound is breathtaking

20W*2 speakers
High-quality speaker

Powerful sound quality
The original sound feast is extraordinary

Professional digital power amplifiers, tuned by the global audio laboratory of Huorui, deliver a stunning audio effect with wide high-frequency range, high balance, high dynamic range and high fidelity.

Functional features
It's extremely useful.

Horion Fei Xiang

Code upload file

Cross-screen file upload

One-click file upload

Scan the code to share quickly

Convenient and fast

Scan the code with your mobile phone, and with just one click, upload the pictures, PPTS and other items on your phone to the meeting tablet. Sharing and display are more stable and fast.

Information Release System (Big Screen Hub)

One person is in charge of ten thousand screens

The brand-new self-developed multimedia information release system of Haorui - Big Screen Hub, enables you to send notifications and broadcasts. With just one click on your mobile phone or computer, all large screens can be easily synchronized, making the release and management of information on large screens more efficient and secure.

Remote whiteboard collaboration

Real-time synchronization of writing

When holding meetings in different locations, Haoli helps teams achieve remote collaboration, whiteboard sharing, smooth display of handwriting synchronization between both parties in different locations, and also supports sharing PPTS, facilitating efficient discussions between both sides.

Classic work

It looks good no matter how you look at it

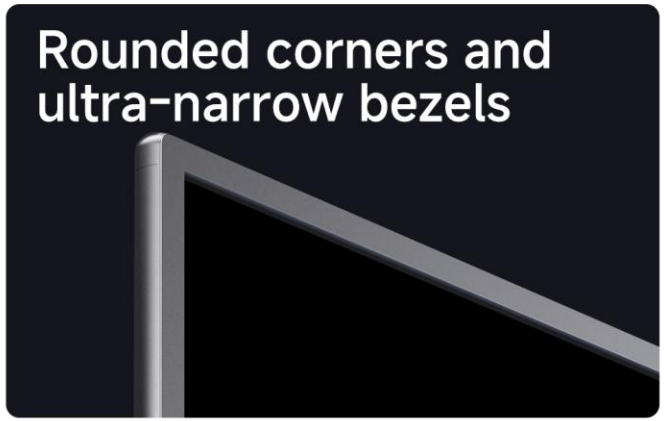

The design is complex yet simple, allowing you to enjoy flexible office work and showcasing the new image of high-end conferences everywhere.

Minimalist appearance and technological aesthetics

Rounded corners with ultra-narrow bezels/dark gun-colored business appearance/aluminum alloy metal body
Sandblasting oxidation process / National patented design base / portable storage tray

Fully launch the new experience of smart office

The intelligent terminal integrating whiteboard writing, intelligent meetings and a vast number of office applications meets the smart office needs of multiple scenarios such as enterprise meeting rooms, manager's offices and open office areas.

Regular meeting room

Daily local activities, plan discussions, and presentation speeches

Open office space
